EDUCATION

Raj Kumar Goel Institute of Technology(AKTU)

Bachelor of Technology in Computer Science | CGPA: 8.37

Ghaziabad, IN

August 2022 – May 2026

Ingraham Institute English School(CISCE)

85.20% in Senior Secondary

94.16% in High School

Ghaziabad, IN

April 2021 – April 2022

April 2019 – April 2020

EXPERIENCE

CREDEX TECHNOLOGY | System Trainee

Nov 2025 – Present

- Contributed to backend development using Core Java in modular, integration-based architectures, improving maintainability.
- Analyzed logs and assisted in debugging issues across integrated services, enabling faster resolution.
- Worked with OAuth 2.0 (JWT, Client Credentials), REST/SOAP APIs, and structured query handling in real-world scenarios.
- Supported API integration and managed data flow across distributed systems for smooth communication.
- Used PostgreSQL, Git, Spring Boot, and Docker in a collaborative environment for development and deployment.

CENTRE FOR RAILWAY INFORMATION SYSTEMS | Intern

June – Aug 2025

- Explored and documented the role of Cloud Computing in enabling scalable AI/ML training environments.
- Investigated distributed deep learning frameworks, with emphasis on challenges such as straggler nodes in multi-GPU training.
- Reviewed and evaluated techniques including Median Absolute Deviation (MAD) detection, Automatic Mixed Precision (AMP), and Gradient Scale Consistency (GSCM).
- Authored a technical synopsis report on ResNet models with CIFAR datasets, summarizing key research findings.

PROJECTS

WELLUS : AI Diet Planner | React Native, Convex, Firebase

September 2025

- Built an AI nutrition app with 7+ features using React Native and modular architecture (10+ screens).
- Integrated 4+ services (OpenAI, ML Kit, Firebase, OCR APIs) for AI-driven meal planning and tracking.
- Implemented OCR scanning for 5+ nutrition metrics and adaptive monitoring of user behavior.
- Presented at an IEEE conference as part of a 4-member team (paper under review).

The Chess Game | Python, Pychess, Chess.engine

September 2024

- Built a chess game with 2 modes and 100% legal move validation using python-chess.
- Integrated Stockfish (ELO 3500+) enabling AI moves within 2 seconds per turn.
- Designed GUI with 8×8 board, drag-drop controls, and 5 time presets for gameplay.

CERTIFICATIONS

NPTEL - Programming in JAVA

Issued by NPTEL

- Completed a comprehensive course on Java programming, covering object-oriented concepts and core libraries.

NPTEL - The Joy of Computing using PYTHON

Issued by NPTEL

- Gained foundational knowledge in Python with practical programming tasks and problem-solving techniques.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, HTML/CSS

Frameworks & Libraries: Spring, React Native, Firebase

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, Cursor

Coursework: Data Structures and Algorithms, DBMS, OOPS, Computer Networks, Operating System, ML

ACHIEVEMENTS

Technical Achievements

- Solved 250+ DSA problems across LeetCode, GFG, and other platforms.
- Led a 4-member team to develop WELLUS (AI diet planner app).
- Certified in Python (Basic) and Java (Basic) by HackerRank.
