EDUCATION

Raj Kumar Goel Institute of Technology (AKTU)

B.Tech in Computer Science | CGPA: 8.44

Ghaziabad, IN

Aug 2022 – Jun 2026

Ingraham Institute English School (CISCE)

Senior Secondary: 85.20% | High School: 94.16%

Ghaziabad, IN

2019 – 2022

EXPERIENCE

Credex Technology | Associate Software Engineer

Jul 2026 – Present

Backend Engineer, Integration Platform (iPaaS) team

Noida, IN

- Designed and delivered a generic GraphQL integration connector, owning architecture, technical design, Angular query-builder POC, implementation, testing, and customer validation.
- Developed and implemented generic GraphQL query and mutation activities in Java (graphql-java 20.0) using AST-based query generation for reusable GraphQL integrations.
- Maintained production integration connectors. Shipped new features, fixed production issues, and worked with senior engineers and customer-facing teams.

Credex Technology | System Trainee

Nov 2025 – Jun 2026

Backend Engineer, Integration Platform (iPaaS) team

Noida, IN

- Built authentication flows (OAuth 2.0, JWT, Client Credentials, 3-Legged OAuth) for CRM, e-commerce, and GraphQL integration connectors.
- Authored the technical design for a CRM integration using the force-wsc SDK.
- Built a pgvector integration connector prototype supporting CRUD operations and semantic vector search using Cosine, Euclidean, and L2 distance metrics.
- Resolved a Java 8 compatibility issue affecting AI integration connectors and developed a profanity detection POC later integrated through the OpenAI Moderation API.

PROJECTS

WELLUS – AI Dietary Management System | React Native, Convex, Firebase, OCR

May 2026

- Co-authored, presented, and defended “WELLUS: An Intelligent Dietary Management System Using OCR, Adaptive Monitoring, and Explainable AI” at an IEEE international conference as first author on a 4-member team.
- Developed an AI-powered nutrition platform integrating OCR food-label scanning, BMR/TDEE-based personalized guidance, a rule-based adaptive engine, and an explainable AI layer using OpenAI, Google ML Kit, Firebase, and Convex.

Nexus960 | Next.js, Fastify, Socket.io, PostgreSQL, Redis

Mar 2026 – Present

- Designing and building a Chess960-first competitive chess platform solo: real-time play/matchmaking, Elo rating pools, live tournaments (Swiss/Arena/Knockout), and a Stockfish-based analysis board, with the server as sole authority over game state.
- Built the monorepo (Next.js, Fastify + Socket.io, shared TypeScript packages) and deployed it on Vercel and Railway with Supabase Postgres and Upstash Redis.

CERTIFICATIONS

NPTEL – Programming in Java · The Joy of Computing using Python

HackerRank – Java (Basic), Python (Basic)

TECHNICAL SKILLS

Languages: Java, Python, SQL, TypeScript, HTML/CSS

Backend & APIs: Spring Boot, GraphQL (graphql-java), REST, SOAP, OAuth 2.0/JWT

Databases: PostgreSQL, Redis, Firebase, Convex

Tools: Git, Docker, Postman, IntelliJ IDEA, Cursor, Claude Code

Coursework: Data Structures & Algorithms, DBMS, OOP, Computer Networks, Operating Systems, ML

ACHIEVEMENTS

- Published and presented an IEEE conference paper as first author while working full-time. Solved 250+ DSA problems across LeetCode and GeeksforGeeks.
